American Pacific Mining Announces the Expansion of Lode Claims and Plans an Exploration Program at its South Lida Project in Nevada

Vancouver, British Columbia / April 5, 2022 - American Pacific Mining Corp (CSE: USGD / OTCQX: USGDF / FWB: 1QC) (“American Pacific” or “the Company”) is pleased to announce that it has expanded its South Lida Project land package in Nevada to 1,500 acres by staking 64 additional claims.

An initial sampling program is planned to evaluate the new claims and to identify new targets on the property and data collected will be included in an updated NI 43-101 Technical Report (“**NI 43-101**”) expected later this year.

The Project is being explored as a sediment hosted, Carlin-type, structurally controlled epithermal gold system. The Project is in western Nevada where the southern part of the Walker Lane structure merges with the Owens Valley and Furnace Creek faults. The Walker Lane is a major northwest-southeast-trending structural zone that hosts a variety of precious metal and base metal mineral deposits.

“Historical sampling at South Lida has yielded gold values of up to 11.45 grams per tonne gold, 1,280 grams per tonne silver and 20.8 percent copper, so it is clearly a property of merit. The presence of multiple intermediate to basic dikes, quartz veins and abundant jasperoids show both epithermal and Carlin-style mineralization signatures. The 2022 program will include outcrop and float sampling, geologic mapping and a gravity survey, which will define drill targets and support further exploration efforts,” stated American Pacific President, Eric Saderholm.

About American Pacific Mining Corp.

American Pacific Mining Corp. is a precious metals explorer focused on opportunities in the Western United States. The Company's flagship asset is the high-grade, past-producing Madison Copper-Gold project in Montana, under option to joint venture with Kennecott Exploration Company, a division of the Rio Tinto Group, which the Company acquired in 2020. For this transaction, American Pacific was selected as a finalist in the S&P Global Platts Global Metals Awards, an annual program that recognizes exemplary accomplishments in 16 performance categories, including 'Deal of the Year,' the category in which American Pacific Mining competed. The awards program is hosted by S&P Global Platts, the leading independent provider of information and benchmark prices for the commodities and energy markets. Also in the American Pacific's asset portfolio are the Gooseberry Silver-Gold project and the Tuscarora Gold-Silver project: two high-grade, precious metals projects located in key mining districts of Nevada, USA. The Company's mission is to grow by the drill bit and by acquisition.

On Behalf of the Board of American Pacific Mining Corp.
